Smart Woodstain
SPWOOD
1, 5 & 20 Litre

Description

**Smart Woodstain** is a specially formulated Urethane Alkyd base high gloss enamel finish for protection of wooden surface. It has good water resistance, UV protection, anti fungus properties. It is fast drying and easily recoatable.

Usage

Suitable for use in both interior and exterior where maintaining the texture of wood is desired.

Composition

- **Pigment**: Lightfast non-lead pigments and mineral extenders
- **Binder**: Urethane alkyd base
- **Volume Solid**: 40 +/- 2%
- **Diluent**: White Spirit

Properties

- **Finishing**: Gloss finish
- **Colour**: Refer to color card.
- **Theoretical Coverage**: 10 - 12 m²/Litre (actual coverage dependent on substrate condition.)
- **Drying Time**: * Touch dry – 30 minutes.
  * Hard dry – 3 - 4 hour.
  * Dependent on temperature and humidity.
- **Recoating Interval**: 3 to 4 hours

Application Method

- **Brush**: For normal use thinning is not usually necessary.
- **Roller**: For normal use thinning is not usually necessary.
- **Conventional Air Spray**: Thin with max 10% by volume with white spirit.

Surface Preparation

</thead>
<tbody>
<tr>
<td><strong>New Wood</strong></td>
<td>Surface generally must be clean, dry and free from oil, dirt, wax, grease or other contaminants. Recommend to test color on wood before decide the shade as final color shade depends on the type of wood applied. If gum is presence on surface, it must be clean by lacquer thinner. For recoating, the surface must be rub and clean.</td>
</tr>
<tr>
<td><strong>Previously Painted Wood</strong></td>
<td>Previously painted surface should be thoroughly rubbed down using suitable sandpaper and then dusted off.</td>
</tr>
</tbody>

**Composition / Information on Ingredients**

Certain ingredients, having recognised health effects, are present at concentrations above the exemption limits (0.1% for toxic materials and 1% for all others).

Note: Text for R phrase codes shown (if any) is given in section 16.

**Hazard Identification**

This product has been assessed under the Dangerous Preparations Directive (88/379/EEC) and the Chemicals (Hazard Information and Packaging). Regulations 1993 (CHIP), and is classified as follows:-

<table>
<thead>
<tr>
<th>Hazard</th>
<th>Identification</th>
</tr>
</thead>
<tbody>
<tr>
<td>Toxic</td>
<td>Flammable</td>
</tr>
<tr>
<td>R61</td>
<td>May cause harm to the unborn child.</td>

</table>

**First Aid Measures**

- **General advice**: When symptoms persist or in all cases of doubt seek medical advice. Never give anything by mouth to an unconscious person.
- **Inhalation**: Remove to fresh air. Keep patient warm and at rest. If breathing is irregular or stopped, administer artificial respiration. If unconscious place in recovery position and seek medical advice.
- **Skin contact**: Remove all contaminated clothing immediately. Wash skin thoroughly with soap and water or use recognized skin cleanser.
- **Eye contact**: Remove contact lenses. Irrigate copiously with clean, fresh water for at least 10 minutes, holding the eyelids apart. Seek medical advice.
- **Ingestion**: If accidentally swallowed obtain immediate medical attention. Keep at rest. DO NOT INDUCE VOMITING.
Fire Fighting Measures

Specific Hazards: Hazardous combustion products may include carbon monoxide. Will float and can be reignited on surface water. The vapor is heavier than air, spreads along the ground and distant ignition is possible.

Extinguishing Media: Recommended – alcohol resistant foam, CO2, powders. Do not use waterjet.

Protective Equipment: Full protective clothing and self-contained breathing apparatus.

Recommendations: Fire will produce dense black smoke. Exposure to decomposition products may cause a health hazard. Fire fighters should wear self-contained breathing apparatus. Closed containers exposed to fire should be cooled with water. Do not allow run-off from fire-fighting to enter drains or water-courses.

Accidental Release Measures

Personal precautions: Put on adequate protective equipment. Avoid breathe vapours.

Environmental precautions: Keep away from drains, surface-water, ground-water and soil.

Methods for cleaning up: Collect as much as possible in a clean container for disposal. Cover the remainder with inert absorbent. Disposal according to local.

Handling and storage

Handling: Avoid prolonged or repeated contact with skin. Extinguish any naked flames. Remove ignition sources. Avoid sparks. Do not smoke. Do not empty into drains.

Storage: Keep away from direct sunlight and other sources of heat or ignition. Do not smoke in storage areas. Keep container tightly closed and in a well-ventilated place. Keep container at long time (2 years).

OEL : Occupational Exposure Limits (HSE Guidance Note EH40)
OES : Occupational Exposure Standard
MEL : Maximum Exposure Limit
SUP : Manufacturer’s recommended Limit
LTLM : Long-term Exposure Limit.
TWA : Time weighted Average
STEL : Short term Exposure Limit.
SK : Risk of absorption through unbroken skin

Further guidance on OELs and assessment of occupational exposure to harmful materials (including mixed exposures) is given in HSE Guidance Note EH40.
Respiratory Protection : Avoid the inhalation of vapour, particulates and spray mist. Where reasonably practicable, this should be achieved to maintain concentrations of particulates and solvent vapour below the occupational exposure limit, respirations protection must be worn. The selection of respiratory equipment should be in accordance with BS 4275. Recommendations for the selection, use and maintenance of Respiratory Equipment, and the current certificates of approval are issued by the Health and Safety Executive. The European Group of Vehicle Refinish Manufacturers united in CEPE recommends the use of fresh-air masks as the best personal protection during spraying of any car refinishing paint.

Hand Protection : Wear suitable gloves for protection against materials in section 2.

Eye protection : Wear suitable eye protection to BS 2092.

All the above precautions also apply to dry sanding and thermal decomposition, eg welding or flame cutting of the dried product, which will give rise to dust. steps must be taken to ensure that persons nearby who may be unconnected with the spraying, sanding or hot-work operations, are not affected.

### Physical And Chemical Properties

This product supports combustion.

- Explosion limit lower (%) : 0.6 (Naphtha Hydrodesulf Heavy)
- Explosion limit upper (%) : 8.0 (Naphtha Hydrodesulf Heavy)
- Vapour Pressure (mmHg) : 7.000 (Xylene Mixture Of Isomers)

### Stability and Reactivity

- Stability : Stable under normal use conditions. Reacts with strong oxidizing agents.
- Conditions to Avoid : Heat, flames and sparks.
- Material to Avoid : Keep away from oxidizing agents, strongly alkaline and strongly acidic materials in order to avoid exothermic reactions.
- Hazardous Decomposition Products : When exposed to high temperatures may produce hazardous decomposition product such as carbon monoxide, carbon dioxide, smoke and oxides of nitrogen.

### Toxicological Information

Exposure to component solvent vapour concentrations in excess of the stated occupational exposure limit may result in adverse health effect, such as mucous membrane and respiratory system irritation and adverse effect on kidney, liver and central nervous system. Symptoms and signs include headache, dizziness, fatigue, muscular weakness, drowsiness and in extreme cases, loss of consciousness.
Acute toxicity : No data is available on the product itself.
Local effects : Repeated or prolonged contact with the preparation may cause removal of natural fat from the skin resulting in non-allergic contact dermatitis and absorption through the skin. The liquid splashed in the eyes may cause irritation and reversible damage.

Ecological Information

There is no specific data available on the product itself. The product should not be allowed to enter drains or watercourses or be deposited where it can affect ground or surface waters. Products classified as Marine Pollutants are indicated as such under Transport (section 14).

Disposal Considerations

Waste material and containers must be treated as a fire hazard and disposed of in accordance with the general requirement of the Control of Pollution Act 1974. The 1990 Environmental Protection Act introduced controls on the disposal or depositing of waste. Due regard should be given to the “Duty of Care” required under the regulations and the guidance given under this Act.

Transport Information

Product No : Captain Gloss
Class : 3
UN-No : 1263
Description of the goods : PAINT RELATED MATERIAL
Packing group : III
Release of danger

Product No : Captain Gloss
UN-No : 1263
Hazard Symbol : FLAMMABLE LIQUID
Release of danger

Product No : Captain Gloss
ADR Class : 3
IMDG Class : 3.3
UN/ID No. : 1263
Proper technical name : MARINE POLLUTANT
EMS : 3-05
MFAG : 310
Other Information

Our technical advice – whether verbal, in writing or by way of trials – is given in good faith but without warranty, and this also applies where proprietary rights of third parties are involved. It does not release you from the obligation to test the products supplied by us as to their suitability for the intended processes and uses. The application, use and processing of the products are beyond our control and, therefore, entirely your own responsibility. Should, in spite of this, liability be established for any damage, it will be limited to the value of the goods delivered by us and used by you. We will, of course provide products of consistent quality within the scope of our General Conditions of Sale and Delivery.
